PROFESSIONAL SUMMARY

Engineering Manager and Delivery Lead with 17+ years of experience building and delivering enterprise SaaS platforms, including 6 years on the founding engineering team at Scitara, where I helped scale an enterprise laboratory iPaaS for regulated pharma customers from early prototype to a production platform serving 20+ customers. Promoted from Senior Developer to Principal Engineer to Delivery Manager, leading a team of 15+ engineers across Agile/Scrum delivery, sprint planning, release management, CI/CD, and stakeholder communication while staying hands-on in React, TypeScript, and Node.js. Early adopter of AI-assisted software development (Claude Code, Cursor, GitHub Copilot) across the full SDLC.

CORE COMPETENCIES

Leadership & Delivery: Engineering Management, Delivery Management, Agile / Scrum, Sprint Planning, Backlog Prioritization, Release Planning, Release Management, Roadmap Execution, Stakeholder Management, Cross-Functional Collaboration, Team Development, Mentoring & Coaching, Code Review (PR Review) Governance

Frontend: React.js, TypeScript, JavaScript (ES6+), Redux, Redux-Saga, Material UI, JSON Forms, AngularJS, HTML5, CSS3, Responsive Web Design

Backend: Node.js, Express.js, REST API Design, Java, JSP

Cloud & DevOps: AWS (S3, artifact pipelines), CI/CD Pipelines, Docker, Kubernetes, Helm Charts, Git, GitHub, Release & Artifact Management, Versioning & Tagging

Databases: MongoDB, MySQL, Oracle, SQLite

Tools & Process: Jira, GitHub, Software Development Life Cycle (SDLC), Regulated-Industry Documentation, Audit & Validation Readiness

AI-Assisted Engineering: Claude Code, Cursor, GitHub Copilot, ChatGPT for architecture, code generation, code review, unit-test generation, and technical documentation

PROFESSIONAL EXPERIENCE

Principal Engineer & Delivery Manager, Scitara Corporation Jun 2020 – Present

Scitara DLX: enterprise laboratory integration platform (iPaaS) for pharma and life sciences | Navi Mumbai, India (Remote)

- Core member of the founding engineering team; helped take Scitara DLX from early build to an enterprise platform serving 20+ pharma and life-sciences customers.
- Promoted from Senior Developer to Principal Engineer to Delivery Manager; own end-to-end engineering delivery, sprint planning, release planning, and roadmap execution for a team of 15+ engineers using Agile/Scrum and Jira.
- Led frontend architecture of the platform in React.js, TypeScript, Redux-Saga, and Material UI, including a JSON Forms-driven dynamic form engine that powers core configuration workflows.
- Built and operated the CI/CD release-candidate pipeline: packaging, versioned tagging, and publishing of build artifacts and Helm charts to AWS S3 for Kubernetes deployments, improving release traceability and rollback safety.
- Designed and developed Node.js / Express.js services and REST APIs supporting platform features and laboratory instrument and system integrations.
- Established pull-request review standards and mentored engineers on architecture, code quality, testing, and delivery practices; primary technical interface for product, QA, and customer-facing stakeholders.
- Authored and maintained engineering and release documentation to meet the audit and validation expectations of regulated pharma customers.
- Drove AI adoption across the SDLC, including AI-assisted code review, unit-test generation, and API documentation, reducing code review cycle time by approximately 60%.

Senior Full Stack Developer, Avotima Systech Feb 2020 – Jun 2020

- Built eBusiness Card, a digital business-card web application on the MERN stack (MongoDB, Express.js, React.js, Node.js) with shareable, trackable cards.

Senior Full Stack Developer, Tradesocio Pvt. Ltd. Jun 2019 – Dec 2019

- Developed features for an in-house trading platform used by financial institutions, delivering React.js frontends and Node.js REST services in an Agile team.

Lead Developer (React Full Stack), Precision Automation & Robotics India May 2018 – May 2019

- Led development of an R&D analytics platform (React.js, Node.js) to analyze machine workflows across manufacturing plants, giving plant engineers data-driven visibility into production bottlenecks.

Senior Software Developer, EKI Communication Pvt. Ltd. Jul 2012 – Oct 2017

- Core developer of Survelytics and Survelytics Next, cross-platform market-research survey products (MEAN stack and Android) used by enterprise clients including Nielsen, Ipsos, L'Oréal, GroupM, and Dun & Bradstreet.
- Delivered the L'Oréal iConnect Android app for global consumer-insight capture; built survey applications handling photo, video, and audio data collection at scale.

System Programmer (Java), Konkan Railway Corporation Ltd. Aug 2011 – Jun 2012

- Developed the live train-position module and the online ticket-booking system with payment-gateway integration for the public Konkan Railway website, plus an internal tender-management system.

Java Developer, Technolink Solutions Pvt. Ltd. May 2010 – Jul 2011

- Built an institute management system and an online examination platform, plus multiple client websites (Java, JSP, MySQL).

Java Developer (Trainee), Navsya Technologies Pvt. Ltd. Mar 2009 – Apr 2010

- End-to-end development of client web applications in Java, covering the full lifecycle from requirements gathering to deployment.

EDUCATION

Bachelor of Engineering (B.E.), Computer Engineering 2003 – 2007
University of Mumbai, Mumbai, India
