17+ Years in software
15+ Engineers led
20+ Customers served
~60% Faster code review

PROFESSIONAL SUMMARY

Engineering leader with 17+ years building and delivering enterprise SaaS platforms in React, TypeScript, and Node.js. Spent 6 years on the founding engineering team at Scitara, helping grow an enterprise laboratory integration platform (iPaaS) from early prototype to a production platform serving 20+ regulated pharma and life-sciences customers. Progressed from Senior Developer to Principal Engineer to Delivery Manager, leading 15+ engineers across Agile/Scrum delivery, release management, and CI/CD while staying hands-on in architecture and code, and serving as the primary technical interface to product, QA, and customer-facing stakeholders. Builds hands-on GenAI and architecture projects, including a cited RAG assistant on Anthropic Claude, an event-driven integration pipeline, and an enterprise SSO/RBAC reference. Early adopter of AI across the SDLC, cutting code-review cycle time by about 60%.

PROFESSIONAL EXPERIENCE

Principal Engineer & Delivery Manager

Jun 2020 – Sep 2026

Scitara Corporation

Scitara DLX: enterprise laboratory integration platform (iPaaS) for pharma and life sciences | Navi Mumbai, India (Remote)

- Core member of the founding engineering team; helped take Scitara DLX from early build to an enterprise platform serving 20+ pharma and life-sciences customers.
- Promoted from Senior Developer to Principal Engineer to Delivery Manager; owned end-to-end engineering delivery, sprint planning, release planning, and roadmap execution for 15+ engineers using Agile/Scrum and Jira.
- Led frontend architecture in React.js, TypeScript, Redux-Saga, and Material UI, including a JSON Forms-driven dynamic form engine that powers core configuration workflows.
- Designed and developed Node.js / Express.js services and REST APIs supporting platform features and laboratory instrument and system integrations.
- Built and operated the CI/CD release-candidate pipeline: packaging, versioned tagging, and publishing of build artifacts and Helm charts to AWS S3 for Kubernetes deployments, improving release traceability and rollback safety.
- Primary technical interface for product, QA, and customer-facing stakeholders.
- Established pull-request review standards and mentored engineers on architecture, code quality, testing, and delivery practices.
- Authored and maintained engineering and release documentation to meet the audit and validation expectations of regulated pharma customers.
- Drove AI adoption across the SDLC (AI-assisted code review, unit-test generation, API documentation), reducing code-review cycle time by about 60%.

EDUCATION

Bachelor of Engineering (B.E.), Computer Engineering

2003 – 2007

University of Mumbai, Mumbai, India

CORE COMPETENCIES

Leadership & Delivery

Engineering and delivery management, Agile/Scrum, sprint and release planning, mentoring and coaching

Architecture & Integration

Enterprise SaaS platform design, REST APIs, iPaaS and instrument integration, event-driven delivery (Redis/BullMQ), Kubernetes deployments

GenAI & AI Architecture

RAG design (chunking, embeddings, vector search, cited answers), Anthropic Claude, SSE streaming, prompt-injection defence, LLM-mocked testing

MERN Stack & Web

React.js, TypeScript, JavaScript, Redux-Saga, Material UI, JSON Forms, Node.js, Express.js, MongoDB, AngularJS, Java

Cloud & DevOps

AWS (S3, artifact pipelines), CI/CD, Docker, Docker Compose, Kubernetes, Helm charts, Git, GitHub

Security & Governance

SSO with Keycloak (OIDC, PKCE), RBAC, audit trails, regulated-industry documentation and validation readiness, PR governance

Stakeholder Engagement

Technical interface to product, QA and customer-facing stakeholders; roadmap execution

AI-Assisted Engineering

Claude Code, Cursor, GitHub Copilot, ChatGPT across code review, testing and documentation

Databases & Tools

MongoDB, MySQL, Oracle, SQLite, Redis; Jira, GitHub

SELECTED GENAI & ARCHITECTURE PROJECTS

LabDocs AI · RAG assistant

Node.js, React, Anthropic Claude, transformers.js embeddings, SQLite, SSE

Answers questions from instrument manuals with streamed, cited responses. Questions below a calibrated similarity threshold get a deterministic refusal with no LLM call. Tested prompt-injection guardrail; 17 tests with the LLM mocked.

MiniFlow · Event-driven integration

Node.js, Express, Redis, BullMQ, SQLite, React, Docker Compose

Mini iPaaS delivering instrument data to a LIMS: at-least-once delivery with idempotent consumers, jittered exponential retries, a replayable dead-letter queue, and an append-only, checksummed audit trail. 21 tests against real Redis in CI.

Secure Portal · Enterprise SSO & RBAC

React, Node.js, Express, Keycloak (OIDC + PKCE), SQLite, Docker Compose

Offline JWT verification with audience checks, permission-based RBAC enforced on the server, back-channel logout revocation, and auditing of denied access. 14 tests; one-command deployment.

AI-SDLC Playbook · AI governance guide

Workflow, guardrails, prompt templates, rollout plan, metrics

How to adopt AI in a team's SDLC without lowering the quality bar ("AI drafts, humans decide"). From leading adoption on a 15+ engineer team: PR review rounds cut from 3–5 to 1–3.

EARLIER EXPERIENCE

Feb 2020 – Jun 2020

Senior Full Stack Developer

Avotima Systech

- Built eBusiness Card, a digital business-card web application on the MERN stack with shareable, trackable cards.

Jun 2019 – Dec 2019

Senior Full Stack Developer

Tradesocio Pvt. Ltd.

- Developed features for an in-house trading platform used by financial institutions, delivering React.js frontends and Node.js REST services in an Agile team.

May 2018 – May 2019

Lead Developer (React Full Stack)

Precision Automation & Robotics India

- Led development of an R&D analytics platform (React.js, Node.js) that analyzed machine workflows across manufacturing plants, giving plant engineers data-driven visibility into production bottlenecks.

Jul 2012 – Oct 2017

Senior Software Developer

EKI Communication Pvt. Ltd.

- Core developer of Survelytics and Survelytics Next, cross-platform market-research survey products (MEAN stack and Android) used by enterprise clients including Nielsen, Ipsos, L'Oréal, GroupM, and Dun & Bradstreet.
- Delivered the L'Oréal iConnect Android app for global consumer-insight capture, with photo, video, and audio data collection at scale.

Aug 2011 – Jun 2012 — **System Programmer (Java)**, **Konkan Railway Corporation Ltd.** Live train-position module and online ticket booking with payment-gateway integration for the public website.

May 2010 – Jul 2011 — **Java Developer**, **Technolink Solutions Pvt. Ltd.** Institute management system, online examination platform and client websites (Java, JSP, MySQL).

Mar 2009 – Apr 2010 — **Java Developer (Trainee)**, **Navsya Technologies Pvt. Ltd.** End-to-end client web applications in Java, from requirements to deployment.

ADDITIONAL INFORMATION

Domains: Healthcare & life sciences (pharma), BFSI (trading), manufacturing, market research
Languages: English, Hindi, Marathi
Location: Navi Mumbai, India; open to hybrid and remote roles (Mumbai / Navi Mumbai / Pune)
